Professional Summary

MCA graduate and entry-level software engineering candidate with hands-on project experience in Java and Python, including SQL, MySQL, JDBC, Object-Oriented Programming, and database-driven application development. Skilled in debugging, functional testing, input validation, exception handling, application integration, and REST API concepts, with current training in Python Full Stack Development.

Technical Skills

- **Programming Languages:** Core Java, Python
- **Software Development:** Object-Oriented Programming (OOP), Modular & Maintainable Code Design, SDLC, Debugging & Troubleshooting, Exception Handling, Functional Testing, Software Documentation
- **Database Technologies:** SQL, MySQL, JDBC, DBMS, CRUD Operations, Database Connectivity & Integration
- **Application Concepts:** Application Logic, Input Validation, Client–Server Architecture, REST API Concepts, Third-Party API Integration
- **Development & Testing Tools:** Git, GitHub, VS Code, Eclipse, PyCharm, MySQL Workbench, Apache Tomcat, Unit Testing, Integration Testing
- **AI Productivity Tools:** ChatGPT, Codex, Claude, GitHub Copilot
- **Productivity Tools:** Microsoft Excel
- **Process Awareness:** SDLC, Agile, Version Control Workflows

Projects

Online Vaccination Management System 2026
Technologies: Java, JDBC, MySQL, Apache Tomcat

- Designed and developed a Java-based web application to manage vaccination records, user data, and slot-booking workflows using modular application design.
- Implemented MySQL database connectivity through JDBC to support CRUD operations, persistent data storage, and structured data management.
- Implemented user authentication, input validation, and exception handling to support reliable application workflows and data processing.
- Debugged and resolved application and database connectivity issues during development, and conducted functional testing across application workflows and database operations.

RIOSA – Voice AI Assistant 2026
Technologies: Python, Gemini API, Streamlit, SpeechRecognition, Pyttsx3

- Developed a Python-based voice AI assistant integrating speech recognition, text-to-speech, and an LLM to support conversational interaction.
- Integrated the Gemini API to process user queries through an external AI service, demonstrating hands-on experience consuming and working with third-party APIs.
- Built an interactive Streamlit interface for voice interaction and displaying AI-generated conversation responses.
- Structured the application into modular components for speech-to-text, LLM interaction, text-to-speech, and voice processing, with command handling and debugging for reliable runtime behavior.

Training

Python Full Stack Development (In Progress) – KodeNest Technologies 2026

Education

Master of Computer Applications (MCA) 2024–2026
C.V. Raman Global University, Odisha CGPA: 8.40

Bachelor of Science (B.Sc.) 2021–2024
Nigamananda Mahila Mahavidyalaya CGPA: 8.17

Soft Skills

- Communication & Interpersonal Skills • Analytical & Problem-Solving Skills • Learning Agility & Adaptability • Cross-Functional Collaboration • Ownership & Accountability
